Destiny Preservation Funds
Investment Overview

DESTINY
RETIREMENT ANNUITY FUND

Important information about the Destiny Preservation Funds:

- You can use the Destiny Preservation Funds (the Funds) to preserve your exiting retirement savings from a Pension or Provident Fund.
- You may also use the Destiny Preservation Funds to preserve retirement savings from another Preservation Fund.
- You may be allowed to make a once-off partial or full withdrawal before retirement. This is subject to the restrictions of the transferring fund and legislation/regulations.
- You cannot retire from the Fund before age 55 unless you are permanently disabled.
- When you retire from the Destiny Preservation Penson Fund, a maximum of one-third of your investment can be taken as cash. The remainder must be used to purchase an annuity such as the Destiny Living Annuity. The amount taken in cash is taxable.
- If you have not agreed to invest according to the LifeStage Model as recommended by the Board of Trustees then you are responsible for ensuring that the Portfolio you select meets your investment needs and risk profile.
- The return on your investment is not guaranteed. As the market value of your investment may change, you carry the risk of losing.
- Once your investment has been processed, there is no cooling-off period and your investment cannot be cancelled. However, you may transfer your investment to another preservation fund or employer fund registered under the provisions of the Pension Funds Act (1956).

Destiny LifeStage Model

The Destiny Retirement Funds' default investment portfolio is the Destiny LifeStage Model. Unless you advise us per Section 4 hereunder, you will automatically be investe in the Life Stage Model. The Model invests your assets according to your age and assumes a retirement age of 65. Based on the information as per this overview, your Investment Portfolio at inception will be the:

LifeStage Model:	
Passive LifeStage Model:	

Personal Portfolio Selection (%'s will reflect as nil if Life Stage is selected)

Fees Charged (all costs include VAT where applicable)

Effective Annual Cost (EAC)

The effective annual cost (EAC) is a measure that has been introduced to allow you to compare the charges you incur and their effect on investment returns when you invest in different financial products. It is expressed as an annualised percentage. The EAC is made up of four components which are added together, as shown in the table below. The effect of some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor ends his or her investment in the financial product at the end of the relevant periods shown in the table.

Investment Management	Next 1 year	Next 3 years	Next 5 years	Age 55

1. **Investment Management Charges**

'The next table shows the investment fund manager initial and ongoing fees, the investment fund total investment charges (TIC) and the investment fund manager rebate for the investment funds that you chose. An estimate of the total fee that you w pay for investment management is the fund TIC less any rebate, plus the effect of any initial fee. This is the calculation we use for the figure we show in the EAC table.

'The investment managers charge an ongoing fee for managing the assets of a particul investment fund on your behalf. The fee is based on the market value of the underlying investment in each of the investment funds. It is included in the price of the fund and will not reflect as a separate fee on the investment. There are management and operating costs in the investment fund that could have an impact on an investment's growth. The TIC is a recognised method to measure this. It includes the investment manager's ongoing fee as well as any other expenses incurred inside the fund over the last year, such as performance fees and the costs of buying and selling assets underlying the investment component. The TIC is a backward-looking measure, which means that it could change from year to year. If the TIC is not available, we use the tot expense ratio (TER), which is the TIC excluding transaction costs. Where neither the TI nor the TER is available, we use the investment manager's ongoing fee.

'For some investment funds, we perform specialised administrative functions on behalf of the investment managers. In certain agreed circumstances, the investment manage refunds part of the investment fund manager ongoing fee to us – this is called a rebate We pass all rebates on all investment funds back to you. The quoted rebates are at the discretion of the fund manager who can change or withdraw it at any time.

2. Advice Charges

'Your financial adviser will receive a yearly ongoing fee, illustrated above, of the marke value of your investment. We will calculate the amount of the ongoing fee and pay it to your financial adviser every month. These fees are negotiated between you and your financial adviser.

3. Administration Charges

'We charge an ongoing administration fee for the initial setup and ongoing administration of your investment. The ongoing administration fee is illustrated in the above table. We show the combined effect of all administration fees in the administration charge component in the EAC table.

4. Other Charges

'This fee is paid to GIB Financial Services for portfolio construction.....

Important Notes

The Funds are approved preservation funds administered by GIB Financial Services (Pty Limited ("the Administrator"), an approved fund administrator and an authorised financial services provider. The Administrator holds professional indemnity and fidelity insurance cover.

Your interest in the Funds will be managed through an investment account. You will be invested according to the LifeStage Model unless you elect to Opt Out and select one o more investment portfolio as made available by the Fund.

The investment portfolios provide no guarantees. As the value of the investment account may go down as well as up, you bear the risk of the investment performance.

- The business cut off for receiving an instruction is the last day of the month. The instruction will only be processed once the funds reflect in the Destiny bank account and supporting documents and proof of deposit have been received. Should an instruction be received after the last day of the month then it will only be processed on the following month or earlier at the administrator's discretion.

- The unit price that will apply is the price at which the Investment Administrator completes the purchase of units.

- You have 14 days after receipt of the investment confirmation from the Administrator to report any errors to the administrator. The administrator reserves the right to determine whether it has acted incorrectly on the investor’s instruction.

- A switch instruction between investment portfolios will take effect within 7 working days after receipt thereof.

- A withdrawal notification in the prescribed format will take a maximum of ten busines days to process.

In the event of your death before retirement, the trustees of the Fund have the discretion, in terms of Section 37C of the Pension Funds Act 24 of 1956, to apportion the benefit that may become payable between beneficiaries nominated by you and you dependants. Subject to legislation, the beneficiaries and dependants may have the option of receiving their benefit in cash and/or as a pension. These benefits may qualify for tax concessions up to certain limits.

You may transfer your investment in the Fund to another Preservation Fund. These transfers are subject to the requirements of the Destiny Preservation Funds, the fund you transfer to and legislation at the time.

For comprehensive information please refer to the Conditions of Membership available at www.gib.co.za or via the call centre on 0860 00FUND (3863).

*** Option 2 (Waived Initial Fee)**

If this option is selected it means that no initial fee is charged, however, if you withdraw funds before age 55, for any reason, then the following fee will be charged on the withdrawal amount, before any tax is calculated an based on the following period of membership.

One year or less:	2.75% plus VAT
One to Three years	1.75% plus VAT
Three to Five years:	0.75% plus VAT
Five years or more:	0%
